

FIRST BONDED WAREHOUSE OPENED

Last weekend the port's first bonded warehouse was opened at the Railport Terminal in Vaggeryd. The service means that for goods owners and forwarders/shipping lines freight movements are classified as internal port transport thus avoiding the need to clear goods through customs and pay VAT.

Stig-Göran Thorén is responsible for Port of Gothenburg rail operations: "It could be said that we have extended the fence around the Port of Gothenburg to include the terminal in Vaggeryd."
